Background Papers on The IMF and the Crises in Greece, Ireland, and Portugal Dec 03 2020 This volume book brings together nine background papers prepared for an evaluation by the IMF Independent Evaluation Office of "the IMF and the crises in Greece, Ireland, and Portugal." It presents an authoritative work on the evolving relationship between the IMF and the euro area, a common currency area founded in 1999 consisting of advanced, highly integrated economies in Europe. The euro area, or any common currency area for that matter, has posed challenges to the IMF's operational activities as its Articles of Agreement contain no provision for joint membership. The challenges became intense when a series of crises erupted in Greece, Ireland, and Portugal from 2009 to 2011, and the Fund was called upon to help intervene by offering its financing and crisis management expertise. The IMF found itself in uncharted territory where there was no precedent or established procedure. The chapters, many of which are prepared by prominent academics and former senior IMF officials who are thoroughly familiar with internal procedures, discuss various aspects of the IMF's engagement with the euro area, including precrisis surveillance, how key decisions were made, how the IMF collaborated with European institutions, and how it designed and implemented its lending programs

with the three crisis countries. The book gives prominence to governance-related issues, given the large voting share (of more than 20 percent) within the IMF of euro area members and the subsequent public perception that the IMF treated the euro area more favorably than it does developing and emerging market members. The approaches are both cross-cutting and country-based. Some chapters deal with issues related to the euro area as a whole, while others focus on how the Fund engaged with individual euro area countries. The book contains a statement on the IEO evaluation by the IMF Managing Director and a Summing Up of the Executive Board discussion held in July 2016. *The Academic Job Search Handbook* Sep 12 2021 For more than twenty years, job seekers have relied on *The Academic Job Search Handbook* for help in their search for faculty positions. The Changing Face of Compliance Aug 19 2019 In the current business climate the impact of the volume and nature of regulatory change and the regulatory risk arising from this is a significant business risk for regulated firms and regulators alike. As a consequence, management of this risk is increasingly high on the board agenda of regulated firms, with those business functions whose activities support this, such as Compliance, facing increasing levels of challenge in their efforts to be effective. *The Changing Face of Compliance* addresses core

aspects of this challenge, considering the relationship between regulation and compliance and key influences on both, offering insight into the effectiveness of current approaches and addressing practical compliance challenges. Sharon Ward explains how the role of Compliance might be strengthened and those who work within it further enabled to support the current focus on improving standards in business, offering recommendations for enhancing this role. The text includes a mix of hands-on advice, examples and research based on the experiences of practitioners, educators and regulators drawn from across a wide range of jurisdictions and sectors. This is a thoughtful and timely book, whether you are concerned about the growing and changing implications of regulatory risk; the benefit of leveraging additional value from your Compliance function or your own Compliance role; or ways of transforming and sustaining the function to ensure its continued relevance to the business.

The Papers of George Catlett Marshall Sep 24 2022 This final volume details the last decade of Marshall's life. This seventh and final volume of The Papers of George Catlett Marshall covers the last ten years of Marshall's life, when he served as secretary of defense from September 1950 to September 1951 following a year as American Red Cross president. Dramatic swings in fortune for US and UN forces in Korea consumed him as defense secretary, yet Europe remained Marshall's strategic focus and with it the establishment of a NATO military command, efforts to convince the French to accept German rearmament, congressional approval for a major US military buildup, and a Mutual Security Program for America's allies. Marshall also participated in the decision to relieve General Douglas MacArthur, sparking public uproar and a Senate investigation. Marshall remained active and honored in retirement, particularly in 1953, when he led the US delegation to the coronation of Queen Elizabeth II and then became the first professional soldier to win the Nobel Peace Prize, a tribute to the Marshall Plan. Through it all, he maintained an extensive correspondence with national and international leaders. When he died on October 16, 1959, George Catlett Marshall was hailed by many as the nation's greatest soldier-statesman since George Washington.

Ending Extreme Inequality Feb 17 2022 Poverty and inequality are at record levels. Today, forty-seven million Americans live in poverty, while the median is in decline. The top 20 percent now controls 89 percent of all wealth. These conditions have renewed demands for a new economic Bill of Rights, an idea proposed by F. D. Roosevelt, Truman and Martin Luther King, Jr. The new Economic Bill of Rights has a coherent plan and proclaims that all Americans have the right to a job, a living wage, a decent home, adequate medical care, good education, and adequate protection from economic fears of unemployment, sickness and old age. Integrating the latest economic and social data, *Ending Extreme Inequality* explores each of these rights. Each chapter includes: an analysis of the social problems surrounding each right; a historical overview of the attempts to right these wrongs; and assessments of current solutions offered by citizens, community groups and politicians. These contemporary, real-life solutions to inequality can inspire students and citizens to become involved and open pathways toward a more just society.

Shifting Power in Asia-Pacific? Dec 15 2021 This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the

much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

Drone Warfare Apr 26 2020 Choice Outstanding Academic Title for 2015 One of the most significant and controversial developments in contemporary warfare is the use of unmanned aerial vehicles, commonly referred to as drones. In the last decade, US drone strikes have more

than doubled and their deployment is transforming the way wars are fought across the globe. But how did drones claim such an important role in modern military planning? And how are they changing military strategy and the ethics of war and peace? What standards might effectively limit their use? Should there even be a limit? Drone warfare is the first book to engage fully with the political, legal, and ethical dimensions of UAVs. In it, political scientist Sarah Kreps and philosopher John Kaag discuss the extraordinary expansion of drone programs from the Cold War to the present day and their so-called 'effectiveness' in conflict zones. Analysing the political implications of drone technology for foreign and domestic policy as well as public opinion, the authors go on to examine the strategic position of the United States - by far the world's most prolific employer of drones - to argue that US military supremacy could be used to enshrine a new set of international agreements and treaties aimed at controlling the use of UAVs in the future.

The Two-State Delusion Nov 02 2020 Author Pdraig O'Malley is the subject of the new acclaimed documentary *The Peacemaker*. "Impressive . . . [O'Malley] has done a tremendous amount of research about the Israeli-Palestinian conflict." —The New York Times Book Review Disputes over settlements, the right of return, the rise of Hamas, recognition of Israel as a Jewish state, and other intractable issues have repeatedly derailed peace negotiations between Israel and Palestine. Now, in a book that is sure to spark controversy, renowned peacemaker Pdraig O'Malley argues that the moment for a two-state solution has passed. After examining each issue and speaking with Palestinians and Israelis as well as negotiators directly involved in past summits, O'Malley concludes that even if such an agreement could be reached, it would be nearly impossible to implement given a variety of obstacles including the staggering costs involved, Palestine's political disunity and economic fragility, rapidly changing demographics in the region, Israel's continuing political shift to the right, global warming's effect on the water supply, and more. In this revelatory, hard-hitting book, O'Malley approaches the key issues pragmatically, without ideological bias, to

show that we must find new frameworks for reconciliation if there is to be lasting peace between Palestine and Israel.

Justice in Conflict Nov 14 2021 What happens when the international community simultaneously pursues peace and justice in response to ongoing conflicts? What are the effects of interventions by the International Criminal Court (ICC) on the wars in which the institution intervenes? Is holding perpetrators of mass atrocities accountable a help or hindrance to conflict resolution? This book offers an in-depth examination of the effects of interventions by the ICC on peace, justice and conflict processes. The 'peace versus justice' debate, wherein it is argued that the ICC has either positive or negative effects on 'peace', has spawned in response to the Court's propensity to intervene in conflicts as they still rage. This book is a response to, and a critical engagement with, this debate. Building on theoretical and analytical insights from the fields of conflict and peace studies, conflict resolution, and negotiation theory, the book develops a novel analytical framework to study the Court's effects on peace, justice, and conflict processes. This framework is applied to two cases: Libya and northern Uganda. Drawing on

extensive fieldwork, the core of the book examines the empirical effects of the ICC on each case. The book also examines why the ICC has the effects that it does, delineating the relationship between the interests of states that refer situations to the Court and the ICC's institutional interests, arguing that the negotiation of these interests determines which side of a conflict the ICC targets and thus its effects on peace, justice, and conflict processes. While the effects of the ICC's interventions are ultimately and inevitably mixed, the book makes a unique contribution to the empirical record on ICC interventions and presents a novel and sophisticated means of studying, analyzing, and understanding the effects of the Court's interventions in Libya, northern Uganda - and beyond.

Power Without Responsibility Jan 04 2021 This book attacks the conventional history of the press as a story of progress; offers a critical defence and history of public service broadcasting; provides a myth-busting account of the internet; a subtle account of the impact of social media and explores key debates about the role and politics of the media. It has become a standard book on media and other courses: but it has also gone beyond an academic audience to reach a wider public. Hailed as 'a classic of media history and analysis' by the Irish Times and a book that has 'cracked the canon' by the Times Higher, it has been translated into five languages. This edition contains six new chapters. These include the press and the remaking of Britain, the rise of the neo-liberal

Establishment, the moral decline of journalism, the impact of social media and a history of attempts to reform the press. It contains new research on the relationship between programmes, institutions and society. It places key UK institutions in the wider context of international affairs and their impact. The book has been updated to take account of new developments like Brexit and the rise of Jeremy Corbyn and the shift in authority and legitimacy prompted by social media. It does this with a clear explanation of how policy can shape media outcomes.

The Afghanistan Papers Sep 19 2019 A Washington Post Best Book of 2021 The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military become mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, *The Afghanistan Papers* contains "fast-paced and vivid" (The New York Times Book Review) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had "no visibility into who the bad guys are." His successor, Robert Gates, said: "We didn't know jack shit about al-Qaeda." *The Afghanistan Papers* is a "searing indictment of the

deceit, blunders, and hubris of senior military and civilian officials” (Tom Bowman, NRP Pentagon Correspondent) that will supercharge a long-

overdue reckoning over what went wrong and forever change the way the conflict is remembered.
