Multiculturalism and Social Cohesion Jun 18 2021 Does multiculturalism 'work'? Does multiculturalism policy create social cohesion, or undermine it? Multiculturalism was introduced in Canada in the 1970s and widely adopted internationally, but more recently has been hotly debated, amid new concerns about social, cultural, and political impacts of immigration. Advocates praise multiculturalism for its

emphasis on special recognition for cultural minorities as facilitating their social integration, while opponents charge that multiculturalism threatens social cohesion by encouraging social isolation.

Multiculturalism is thus rooted in a theory of human behaviour, and this book examines the empirical validity of some of its basic propositions, focusing on Canada as the country for which the most enthusiastic claims for multiculturalism have been made. The analysis draws on the massive national Ethnic Diversity Survey of over 41,000 Canadians in 2002, the most extensive survey yet conducted on this question. The analysis provides a new and more nuanced understanding of the complex relation between multiculturalism and social cohesion, challenging uncritically optimistic or pessimistic views. Ethnic community ties facilitate some aspects of social integration, while discouraging others. For

racial minorities, relations within and outside minority communities are greatly complicated by more frequent experiences of discrimination and inequality, slowing processes of social integration. Implications for multicultural policies emphasize that race relations present important challenges across Quebec and the rest of Canada, including for the new religious minorities, and that ethnic community development requires more explicit support for social integration.

The Radicals' City: Urban Environment, Polarisation, Cohesion Apr 04 2020

Bringing together comparative case studies from Belfast, Beirut, Amsterdam and Berlin, this book examines the role of the urban environment in social polarisation processes. In doing so, it provides a timely and refreshingly innovative voice in the confusing babble on (counter-)terrorism, urban conflict and community cohesion. Despite their socio-political differences, these cities are telling

the location and shape of very mundane objects such as rubbish bins, bridges, clothes' stores, shopping malls and cafés - in addition to the obvious fences, walls and barbed wire - are often subject to heated controversies and influence the way urban conflict is 'lived' and practised. Within a Science and Technology Studies (STS) theoretical framework, the authors provide a systematic analysis of these four cities and provide many concrete and richly illustrated examples of 'material agency' without losing sight of their specific historical, political, geographical and social conditions. The STS angle permits some surprising, yet extremely convincing, conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts. The authors argue that, although architecture and urban design is clearly not the sole cause of conflict and

polarisation, neither is it completely innocent. Conversely, it cannot be the silver bullet to solve related problems and to create community cohesion. However, the materiality of our cities must not be ignored; in fact, it can and should be 'enrolled' in our efforts. The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers, architects, urban designers, planners, community workers, consultants or police officers. *Transactions* Nov 11 2020 [Social Cohesion and Counter-terrorism](#) May 06 2020 This book offers a research-based contribution to the debate around community cohesion and counter-terrorism policies in Britain. It is based upon privileged access to staff and elected members at five major local authorities, and upon qualitative interviews with a diverse range of individuals from differing ethnic communities who live and work in these areas. *Social Cohesion and Counter-Terrorism*

provides an empirically led critical contribution to the understanding of current policies that have a direct impact upon the experiences of citizens in multi-ethnic urban contexts. It addresses the culpability of the central government in its construction of two policy agendas which have had serious negative consequences for British ethnic relations. The book explores the misfit between central government policy construction and the reality of the local authority's implementation of the policy.

Coherence, Continuity, and Cohesion Feb 24 2022 There is a need for general theoretical principles describing/explaining effective design -- those which demonstrate "unity" and enhance comprehension and usability. Theories of cohesion from linguistics and of comprehension in psychology are likely sources of such general principles.

Unfortunately, linguistic approaches to discourse unity have focused exclusively on semantic elements such as synonymy or anaphora, and have ignored other linguistic elements such as syntactic parallelism and phonological alliteration. They have also overlooked the non-linguistic elements -- visual factors such as typography or color, and auditory components such as pitch or duration. In addition, linguistic approaches have met with criticism because they have failed to explain the relationship between semantic cohesive elements.

coherence. On the other hand, psychological approaches to discourse comprehension have considered the impact of a wider range of discourse elements -- typographical cuing of key terms to enhance comprehension -- but have failed to provide general theoretical explanations for such observations. This volume uses Gestalt theory to provide general principles for predicting one aspect of coherence -- that of continuity - - across the entire range of discourse elements, and also to outline the relationship between cohesion and coherence. The theoretical core of this book argues that the cognitive principles that explain why humans "sense" unity in a succession of sounds (a whole musical piece) or in a configuration of visual shapes (a complete object) are the basis of principles which explain why we "sense" unity in oral, written, and electronically produced documents.

Territorial Cohesion Jun 06 2020 This book offers a comprehensive overview of

several urban related aspects that are of central importance to successful territorial cohesion processes. In essence, it sheds new light on issues concerning urban polycentrism, functional urban regions, integrated sustainable urban development, and the EU Urban Agenda; and on how they can help to achieve territorial cohesion policy goals. As an elusive and fairly recent concept, territorial cohesion has to date only been vaguely debated in the available literature, which for the most part focuses on its historical origins and its relevance for EU policymaking. Instead, this book synthesizes, for the first time, a range of perspectives that place urban elements and policies at the core of territorial cohesion analysis. As such, and given the fact that territorial cohesion is a holistic concept, the book will appeal to a broad readership from both the academic and policymaking arenas.

Pragmatics Perspective Jun 26 2019 This open access book provides new methodological and theoretical insights into temporal reference and its linguistic expression, from a cross-linguistic experimental corpus pragmatics approach. Verbal tenses, in general, and more specifically the categories of tense, grammatical and lexical aspect are treated as cohesion ties contributing to the temporal coherence of a discourse, as well as to the cognitive temporal coherence of the mental representations built in the language comprehension process. As such, it investigates the phenomenon of temporal reference at the interface between corpus linguistics, theoretical linguistics and pragmatics, experimental pragmatics, psycholinguistics, natural language processing and machine translation.

Nation Formation and Social Cohesion Aug 01 2022 Nation Formation and Social Cohesion is the publication of a MISTRA research project that set out to examine different interpretations and meanings that diverse social actors attach to the calls and prospects for nation formation and social cohesion. The publication links theories of nation formation and social cohesion to actual practices, both focused on the attainment of a just society founded on the irreducible equality of all its members on the one hand, and the factors militating against

achieving this, on the other. Ethnographic research in four provinces provides the substance or practice to the theoretical framing of the discourse. The study proceeds by interrogating the theoretical suppositions of nation formation and social cohesion and this serves as a starting point for a thorough reflection on these two processes. Thus a synthesis, and not a conceptual position is arrived at, where the interdependence of nation formation and social cohesion, specifically for postcolonial societies, (and South Africa in particular) can be interrogated effectively and critically. This publication, with contributors Andries Oliphant, Yacoob Abba Omar, Joel Netshitenzhe, Leslie Dikeni, Shepi Mati, Vincent Williams, Robert Gallagher and Feizel Mamdoo, is intended to add to the debate and stimulate new thinking around the difficult processes that are being sought to build a nation in the 21st century.

Social Cohesion in Asia Sep 02 2022 This book explores the historical origins, contemporary dynamics and future challenges of social cohesion in South, Southeast and East Asia—one of the most dynamic and at the same time heterogeneous regions in the world, in terms of economic, political and human development. The comparative case studies in this volume develop a better understanding of social cohesion in Asia by exploring how social cohesion is understood, analyzed and sometimes politically instrumentalised. Examining different dimensions and qualities of social cohesion and how they are linked together, it also discusses the challenges of social cohesion in individual societies. The case studies include examples from Bangladesh, India, Sri Lanka, Indonesia, Myanmar, Singapore, South Korea and Mainland China and building on the conceptual work and empirical findings of the Asian Social Cohesion [Read To, This](#)

Transactions of the American Institute of Mining and Metallurgical Engineers Dec 13 2020 [Economic Growth and Cohesion Policy Implementation in Italy and Spain](#) Mar 28 2022 This book concerns EU Cohesion Policy and the economic convergence of underdeveloped regions in Italy and Spain from the first programming period to the

present: it investigates the political and institutional factors that determine the success or failure of implementing EU Cohesion Policy at national and sub-national level, as well as their impact on economic growth. On the wave of the American tradition of development studies, this book suggests that public policy analysis can be fruitful for understanding economic growth and cohesion, if it were to reconstruct domestic public interventions for development and the institutional characteristics of the subjects responsible for pursuing development goals. To do so, this book derives its theoretical foundations from the traditional debate on the role of state actors in promoting economic development and on the institutional characteristics that the public authorities involved in the process of economic development should display. More precisely, by adopting an Hirschmanian approach to development, it elaborates an original

Territorial Cohesion Jan 02 2020 "Territorial cohesion" strives for a more balanced spatial development and seeks to improve integration throughout the EU. The scientific articles in this volume examine the interpretations of this term, the challenges of European spatial development policy, and the problems and concepts involved in achieving territorial cohesion. Two short reports illustrate the implementation of territorial cohesion on the basis of two research projects.

Community Cohesion Oct 03 2022 In this timely study, the

author examines the historical approach to race and diversity and suggests that equality strategies have been a vital, but limited, means of addressing discrimination and community tensions.

Community Cohesion, it argues, offers a new framework to break down the barriers between different communities and understand the more fundamental causes of racism and the 'fear of difference'. Concepts of multiculturalism, identity and citizenship are also reviewed and the developing practice of community cohesion is described.

Cohesion in English Nov 23 2021

Cohesion in English is concerned with a relatively neglected part of the linguistic system: its resources for text construction, the range of meanings that are specifically associated with relating what is being spoken or written to its semantic environment. A principal component of these

resources is 'cohesion'. This book studies the cohesion that arises from semantic relations between sentences. Reference from one to the other, repetition of word meanings, the conjunctive force of but, so, then and the like are considered. Further, it describes a method for analysing and coding sentences, which is applied to specimen texts.

Building Coherence and Cohesion Dec 01 2019 This book examines the resources that speakers employ when building conversations. These resources contribute to overall coherence and cohesion, which speakers create and maintain interactively as they build on each other's contributions. The study is cross-linguistic, drawing on parallel corpora of task-oriented dialogues between dyads of native speakers of English and Spanish. The framework of the investigation is the analysis of speech genres and their staging; the analysis shows that each stage in the dialogues exhibits different

thematic, rhetorical, and cohesive relations. The main contributions of the book are: a corpus-based characterization of a spoken genre (task-oriented dialogue); the compilation of a body of analysis tools for generic analysis; application of English-based analyses to Spanish and comparison between the two languages; and a study of the characteristics of each generic stage in task-oriented dialogue. *GECCo - German-English Contrasts in Cohesion* Jan 26 2022 In contrastive linguistics of English and German, there is a tradition of accounting for contrasts with respect to grammar and, to a lesser extent, for lexis and phonetics. Moving on to discourse and text, there is a sizeable body of literature on cohesive patterns in English and German respectively - but very little in terms of a comparison. The latter, though, is of particular interest for language learners, translators and, of course, linguists and researchers in language technology. This book attempts to close this gap.

based on a number of years of corpus-based study into variation and cohesion in the two languages. While there is an overall focus on language contrasts, it also investigates variation between different registers language-internally, and between written and spoken mode in particular. For each of the five major types of cohesion (co-reference, substitution, ellipsis, conjunctive relations and lexical cohesion), overviews are given of contrasts in the system and of contrastive frequencies in texts. Results and methods presented in this book are thus relevant for language teaching, translation, language technology and corpus-based work on English and German generally.

Aspects of Cohesion and Coherence in Translation

Apr 28 2022 This book deals with the (re)production of cohesion and coherence in

translation. Building on the theories and methods of Translation Studies and Discourse Analysis it answers some basic, still much debated questions related to translational discourse production. Such a question is whether it is possible to analyse the (re)production of coherence, and if yes, how? Can the models devised for the study of English original (not translated) and independent texts (unlike translations and their sources) be applied for the analysis of translation? How do cohesive, rhetorical and generic structure “behave” in translation? How do particular components of coherence relate to translation universals? The volume proposes a complex translational discourse analysis model and presents findings that bring new insights primarily for the study of news translation, translation strategies and translation universals. It is recommended for translation researchers, discourse analysts, practicing translators, as
