Japan, Australia and Asia-Pacific Security Sep 10 2020 The threats to security in Southeast Asia have been serious and constant since the end of the Second World War. The book provides an absorbing account of the evolution of a key axis of regional stability - defence contacts between Japan and Australia, tracing the relationship from the early post-war period to the post-9/11 present. Though most works have focused on their economic nexus, Japan and Australia's defences and security ties have assumed increasing importance since the mid-1990s. With problems such as North Korea's nuclear program and the China-Taiwan standoff threatening regional stability, the two countries have sought to strengthen bilateral relations, and indications are that this relationship is likely to grow in the future. *Japan, Australia and Asia-Pacific Security* explores the evolution of their relationship in the broader context of Asia-Pacific security, addressing regional, sub-regional and transnational issues. This captivating book will be welcomed by those with an interest in Asian politics, international relations, and security studies.

Capital and Labour in the British Columbia Forest Industry, 1934-74 Feb 13 2021 The history

of British Columbia's economy in the twentieth century is inextricably bound to the development of the forest industry. In this comprehensive study, Gordon Hak approaches the forest industry from the perspectives of workers and employers, examining the two institutions that structured the relationship during the Fordist era: the companies and the unions. He relates daily routines of production and profit-making to broader forces of unionism, business ideology, ecological protest, technological change, and corporate concentration. The struggle of the small-business sector to survive in the face of corporate growth, the history of the industry on the Coast and in the Interior, the transformations in capital-labour relations during the period, government forest policy, and the forest industry's encounter with the emerging environmental movement are all considered in this eloquent analysis.

Politics and Left Unity in India Sep 30 2019 The historical assessments of Left unity in 1930s India misrepresent activities designed to achieve unity. The common treatment of the relationship between Indian socialists and communists emphasizes disunity and the inability to find common ground. Scholarly discussions about unity in fact highlight its impracticality and the inevitability of

its failure. This book proposes that during this moment, for socialists and communists, unity was not just an ideal, but was in fact considered to be a possible and very realizable goal. Rather than focusing exclusively on ideological fissures as the literature does, the book explores the possibilities for unity. The author investigates the United Front as a conceptual framework for collaboration, as a scheme for assessing the extent to which cooperation between socialists and communists was feasible and practicable during the mid-to-late-1930s in India. He employs the notion of United Front as an instrument for identifying and compensating for the prejudices which permeate sources about the cooperation between the Congress Socialist Party (CSP) and the Communist Party of India (CPI). The author challenges the historicism found in extant scholarly assessments of Left unity by illustrating the ways in which the partners engaged in united front activities and approached the common goal of Left unity despite their fragmented ideological perspectives. The book presents the United Front not as an unsuccessful phase of collaboration, but rather as a concerted attempt to achieve ideological convergence and Left homogeneity which ultimately failed to radicalize Indian nationalism because, in reality, conditions for Left unity did not exist. The book will be of interest to academics studying South Asian history and politics in particular, and socialism, communism, nationalism and imperialism more generally.
