Studying Religion Aug 19 2019 Widely used as a primer, a class text, or just a provocation to critical thinking, *Studying Religion* clearly explains the methods and theories employed in the academic study of religion by tackling the problem of how we define religion. Written for newcomers to the field, its chapters explore the three main ways in which religion is defined and, along the way, also considers a range of related topics, from the history and functions of religion to public discourse on religion, religion in the courts, and the classification of religions. The works of classic and contemporary scholars—from Karl Marx and Sigmund Freud to Bruce Lincoln and Wendy Doniger—are analyzed and explored in its readable chapters and detailed supporting materials. *Studying Religion* represents a shift away from the traditional world religions approach and, instead, invites readers to consider how they divide up, name, and come to know the world around them. Thoroughly revised throughout, this second edition now includes a significantly expanded glossary, summaries of technical terms and global case studies at the end of each chapter, and additional biographies of key scholars mentioned. This book will be invaluable to all students of religious studies—whether in the introductory class or as an example of an alternative way of approaching the field.

Tales of Wonder LP Aug 31 2020 Smith's life is a story of uncanny synchronicity. He was there for pivotal moments in human history such as the founding of the United Nations and the student uprising at Tiananmen Square. As he traveled the world he encountered thinkers who shaped the twentieth century, including Eleanor Roosevelt, Martin Luther King Jr., and Thomas Merton. In search of intellectual and spiritual treasures, Smith traveled to India to meet with Mother Teresa, befriended the Dalai Lama, and recorded music with Pete Seger. His life is an extraordinary adventure, and in his amazing *Tales of Wonder*, he invites you to come along to explore your own vistas of heart, mind, and soul.

Religious Reading and Everyday Lives in Devotional Hinduism Jul 18 2019 Religious texts are not stable objects, passed down unchanged through generations. The way in which religious communities receive their scriptures changes over time and in different social contexts. This book considers religious reading through a study of the Pushtimarg, a Hindu community whose devotional practices and community identity have developed in close relationship with Vārtā Sāhitya (*Chronicle Literature*), a genre of Hindi prose hagiography written during the 17th century. Through hagiographies that narrate the relationships between the deity Krishna and the Pushtimarg's early leaders and their disciples, these hagiographies provide community history, theology, vicarious epiphany, and models of devotion. While steeped in the social world of early-modern north India, these texts have continued to be immensely popular among generations of modern devotees, whose techniques of reading and exegesis allow them to maintain the narratives as primary guides for devotional living in Gujarat—the western state of India where the Pushtimarg thrives today. Combining ethnographic fieldwork with close readings of Hindi and Gujarati texts, the book examines how members of the community engage with the hagiographies through recitation and dialogue in temples and homes, through commentary and translation in print publications and on the Internet, and even through debates in courts of law. The book argues that these acts of reading inform and are informed by both intimate negotiations of the family and the self, and also by politically potent disputes over matters such as temple governance. By studying the texts themselves, as well as the social contexts of their reading, *Religious Reading and Everyday Lives in Devotional Hinduism* provides a distinct example of how changing class, regional, and gender identities continue to shape interpretations of a scriptural canon, and how, in turn, these interpretations influence ongoing projects of self and community fashioning.

Critical Terms for Religious Studies Nov 14 2021 A century that began with modernism sweeping across Europe is ending with a remarkable resurgence of religious beliefs and practices throughout the world. Wherever one looks today, from headlines about political turmoil in the Middle East to pop music and videos, one cannot escape the pivotal role of religious beliefs and practices in shaping selves, societies, and cultures. Following in the very successful tradition of *Critical Terms for Literary Studies* and *Critical Terms for Art History*, this book attempts to provide a revitalized, self-aware vocabulary with which this bewildering religious diversity can be accurately described and responsibly discussed. Leading scholars working in a variety of traditions demonstrate through their incisive discussions that even our most basic terms for understanding religion are not neutral but carry specific historical and conceptual freight. These essays adopt the approach that has won this book's predecessors such widespread acclaim: each provides a concise history of a critical term, explores the issues raised by the term, and puts the term to use in an analysis of a religious work, practice, or event. Moving across Judaism, Christianity, Hinduism, Buddhism, Islam, and Native American and Mayan religions, contributors explore terms ranging from experience, territory, and image, to God, sacrifice, and transgression. The result is an essential reference that will reshape the field of religious studies and transform the way in which religion is understood by scholars from all disciplines, including anthropology, sociology, psychology, cultural studies, gender studies, and literary studies.

The Dance of Siva Dec 23 2019 This is a full account of Siva's Dance of Bliss, which has become a popular symbol in the West for Hinduism and Eastern Mysticism. Siva is one of the two main gods of Hinduism, and his worshippers comprise half of all Hindus. Siva's Dance of Bliss is based on a remarkable Sanskrit poem written by Umapati Sivacarya, Saiva theologian and temple priest in Cidambaram, South India, in the fourteenth century. Starting with the bronze image of Nataraja, King of Dancers, thereafter the Cidambaram temple, its myth and its priests are viewed in the light of the poem. Umapati's Saiva theology is discussed in relation to his life and also in relation to Vedanta and yoga. The iconography and mythology of the Goddess and of other forms of Siva provide necessary perspective. Art from Cidambaram and neighbouring sites illuminates the text.

Who Invented Hinduism Feb 05 2021 *Who Invented Hinduism?* presents ten masterly essays on the history of religious movements and ideologies in India by the eminent scholar of religious studies, David N. Lorenzen. Stretching from a discussion on the role of religion, skin colour and language in distinguishing between the Aryas and the Dasas, to a study of the ways in which contact between Hindus, on the one hand, and Muslims and Christians, on the other, changed the nature of the Hindu religion, the volume asks two principal questions: how did the religion of the Hindus affect the course of Indian history and what sort of an impact did the events of Indian history have on the Hindu religion. The essays cast a critical eye on scholarly Arguments which are based as much on current fashion or on conventional wisdom as on evidence available in historical documents. Taking issue with renowned scholars such as Louis Dumont, Romila Thapar, Thomas Trautmann and Dipesh Chakrabarty on some central conceptions of the religious history of India, Lorenzen establishes alternative positions on the same through a thorough and compelling look at a vast array of literary sources. Touching upon some controversial arguments, this well-timed and insightful volume draws attention to the unavoidably influential role of religion in the history of India, and in doing so, it creates a wider space for further discussion focusing on this central issue.

Fabricating Religion Oct 01 2020 The revised essays collected here, four of which are published for the first time, continue a longstanding argument made by McCutcheon and others: that the study of religion would benefit from self-conscious scrutiny of its tools, the interests that may drive them, and the effects that might follow their use. The chapters examine a variety of contemporary sites in the modern field where this thesis can be argued, whether involving the anachronistic use of the category religion when studying the ancient world to current interest in so-called critical religion or critical realist approaches. Moreover – contrary to some past characterizations of such critiques – a constructive way forward for the field is once again recommended and, at several sites, exemplified in detail: redescribing not only religion as something ordinary but also our tendency to create the impression of exceptional and thus set-apart things, places, and people. Aimed at scholars and students alike, the book is an invitation to examine our own scholarly practices and thereby take a more active role in shaping the field in which we carry out our work as scholars of this thing we call religion.

Interpretations of the Bhagavad-Gita and Images of the Hindu Tradition Aug 11 2021 *The Bhagavad-Gita* is probably the most popular - and certainly the most frequently quoted and widely studied - work of the Hindu scriptures. This book investigates the relationship between the various interpretations of the Bhagavad-Gita and the Hindu tradition. Taking into account a range of influential Indian and western thinkers to illustrate trends in writing about the Bhagavad-Gita including Western academic; Indian activist; Christian theological; Hindu universalist; perennialist mystical and contemporary experiential accounts. Examining the ideas of such influential figures as F Max Muller, M K Gandhi, Bede Griffiths, Swami Vivekananda, Aldous Huxley and Swami Bhakivedanta, this book demonstrates the inextricable link between different interpretations of the Bhagavad-Gita and images of the Hindu tradition. This accessible book aptly demonstrates the relevance of the Bhagavad-Gita for an understanding of Hinduism as a modern phenomenon.

Advaita, Christianity and the Third Space Apr 26 2020 This book examines the space of meeting between two religions that open up when there are honest attempts at interreligious learning. Taking Abhishiktananda and Bede Griffiths as exemplars, and the meeting between Advaita Vedanta and Christianity, the nature of the theological movements within this <Third Space> are identified, and the resultant hybridities are assessed for their relevance to each tradition. After brief biographical sketches, the author considers how these two monks related to the Indian space and the background of colonial history, and then proceeds to use comparative theology and postcolonial theory to examine their theology. *Third Space Theory* provides insights into the process of hybridization that is taking place, leading to an appreciation of the importance and challenge in the modern world of Third Spaces of meeting. «Jonathan Smith provides important explorations and reflections on a <third space> and the contribution of a postcolonial theology to the understanding of Christianity and Hinduism. It is a fresh and new challenging work on Abhishiktananda and Bede Griffiths.» Professor Mario I. Aguilar, Director of the Centre for the Study of Religion and Politics, University of St. Andrews «This is a deeply learned and skilful exercise in interweaving resources of postcolonial theory and interreligious dialogue which highlights the multiple processes of conjunction, disjunction,

opposition, and osmosis that dynamically shape the in-between domains of Hindu-Christian engagements». Dr Ankur Barua, Lecturer in Hindu Studies, Faculty of Divinity, University of Cambridge
