range function flux 0 x documentation influxdata
Jun 10 2021 range filters rows based on time
bounds input data must have a time column of
type time rows with a null value in the time are
filtered range adds a start column with the value
of start and a stop column with the value of stop
start and stop columns are added to the group
key each input table s group key value is
modified to fit within the time bounds

telegraf plugins telegraf 1 19

documentation Dec 04 2020 apache http
server plugin id inputs apache telegraf 1 8 0 the
apache http server input plugin collects server
performance information using the mod status
module of the apache http server typically the
mod status module is configured to expose a
page at the server status auto location of the
apache server the extendedstatus option must
be enabled in

window and aggregate data with flux

influxdata Jul 23 2022 when visualized in the

influxdb ui each window table is displayed in a
different color aggregate data aggregate
functions take the values of all rows in a table
and use them to perform an aggregate operation
the result is output as a new value in a single
row table
