Jewish High Society in Old Regime Berlin Dec 30 2019 During the quarter century between 1780 and 1806, Berlin's courtly and intellectual elites gathered in the homes of a few wealthy, cultivated Jewish women to discuss the events of the day. Princes, nobles, upwardly mobile writers, actors, and beautiful Jewish women flocked to the salons of Rahel Varnhagen, Henriette Herz, and Dorothea von Courland, creating both a new cultural institution and an example of social mixing unprecedented in the German past.

**Troubled Times** Jul 25 2019 Evidence amassed in *Troubled Times* indicates that, much like in the modern world, violence was not an uncommon aspect of prehistoric dispute resolution. From the civilizations of the American Southwest to the Mesolithic of Central Europe, the contributors examine violence in hunter-gatherer as well as state societies from both the New and Old Worlds. Drawing upon cross-cultural analyses, archaeological data, and skeletal remains, this collection of papers offers evidence of domestic violence, homicide, warfare, cannibalism, and ritualized combat among ancient peoples. Beyond the physical evidence, various models and explanations for violence in the past are explored.

**What We Owe Each Other** Oct 27 2019 From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. **What We Owe Each Other** identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, **What We Owe Each Other** provides practical solutions to current challenges and demonstrates how we can build a better society—together.

The Social Construction of Gender Apr 13 2021 Published in *Cooperation with Sociologists for Women in Society* "Women are women and men are men"--this old aphorism is being challenged with ever increasing frequency as social researchers focus on the nature of constructed gender roles. Much of the recent work in this area has appeared in the journal *Gender & Society*, which is the genesis of most of the papers in *The Social Construction of Gender*. In their collection, Lorber and Farrell present the best of current research on how the constructivist approach has been applied to a number of variables, including family structure, the work place, social class, racial

ethnic identity, and politics. Theoretical and methodological implications of the constructed nature of gender roles are highlighted, as well as the existing theories of gender deconstruction. The articles and introductory material in this volume reflect feminist social science theory in concrete ways that make the text accessible to scholars, professionals and students at both the undergraduate and graduate levels. This resource is ideal for courses on feminist studies, sociology of gender, and social theory construction. "One of the strengths of this book is that it provides some conceptual tools that we may not have come across elsewhere. . . . A second strength of the book is the welcome addition of racial/ethnic identity and social class to the issue of gender. . . . All in all, the book is a rich offering of ideas, research, and experience. Each article can stand alone as a valuable contribution; as an anthology, the book insists that we look at the realities of gender." --Smith College Studies in Social Work "A fine collection of current research on one of the major topics of the day. Shows that sociology can be both lively and intellectually illuminating." --R. W. Connell, Macquarie University, Sydney "Psychologists have much to gain from attending to a sociological perspective. The Social Construction of Gender provides that perspective intertwined with an excellent integration of feminist theory and relevant psychological literature. Judith Lorber and Susan Farrell have compiled 18 articles that, like sociology, continually challenge the reader to reflect upon the broad structural issues that pervasively influence construction of reality. . . . well articulated. . . . chapters regarding masculinity consider points of view sometimes overlooked by feminist theorists. . . . provides a solid knowledge base for those feminists in psychology without a sociological background. The Social Construction of Gender was a pleasure to read. Informative, clear, and concise, it presents a view of women's position in Western society that bridges psychology, sociology, economics, management, anthropology, history, politics, religion, and public policy." --Association for Women in Psychology Newsletter

A Rural Society After the Black Death Sep 18 2021 A Rural Society after the Black Death is a study of rural social structure in the English county of Essex between 1350 and 1500. It seeks to understand how, in the population collapse after the Black Death (1348-1349), a

particular economic environment affected ordinary people's lives in the areas of migration, marriage and employment, and also contributed to patterns of religious nonconformity, agrarian riots and unrest, and even rural housing. The period under scrutiny is often seen as a transitional era between 'medieval' and 'early-modern' England, but in the light of recent advances in English historical demography, this study suggests that there was more continuity than change in some critically important aspects of social structure in the region in question. Among the most important contributions of the book are its use of an unprecedentedly wide range of original manuscript records (estate and manorial records, taxation and criminal-court records, royal tenurial records, and the records of church courts, wills etc.) and its application of current quantitative and comparative demographic methods.

**THE INDIAN SOCIETY: Thoughts on our Past, Present and Future from Advaita Vedanta** Feb 21 2022 From the time of 19th century, British employed people passing out from Oxford and Cambridge University to study the thousands of year old Sanskrit texts of India and interpret them in a way that the Indian people never become one. Inspired by the new set of values and might of British Empire these people, also considered as Orientalist, started the work of reading Sanskrit texts and present them in a way which makes people feel that British ways are better than those scriptures. While the prime aim of these interpretations was to hide the robbery of Indian resources, some considered it as reality and helped the British. This help became so vital for the British that a nation which was considered as the golden bird (???? ?? ????????) on earth and even after centuries of invasions and loot still contributing 20-24% of world GDP became one of the poorest nations of the world contributing 1-2% of world GDP with frequent incidents of riots, famine etc. Somewhere one orientalist identified it and in his old age realized that he wasted all his life and knowledge in just showing that the 3,000 year-old Indian Scriptures (as per his idea on the date though they are even older) are inferior to present British knowledge system. The name of this orientalist was Max Muller and he tried to reverse the damage by sharing the need of Indian Knowledge system in those texts to make our inner life perfect, more comprehensive and universal. But the damage was already done and in the last 150 years, many Muller's of a young age are

produced by our education system instead of Muller's who turned wise. Therefore, to throw better light on Indian Society which was missed by Orientalist and present-day young Muller's, this book is developed by using the philosophy of Jagadguru Adi Shankracharya, i.e. philosophy of Advaita Vedanta, which forces us to look for knowledge which is inside human rather than what knowledge a man possesses. It is considered as the true form of Vidya and under present circumstances, it is the most vital need of Indian Society, especially our Administrators who are supposed to serve the people of India as an Iron Pillar. It is vital that they know about the past, present and future of Indian Society and serves it with excellence, as Krishna said, "???? ?????", i.e. Unity (or Yoga) is excellence in Action. Based on it, the book contains relevant information on the topics under Society portion of GS Paper-I such as- Salient features of Indian Society, Diversity of India; Role of women and women's organization, population and associated issues, poverty and developmental issues, urbanization, their problems and their remedies; Effects of globalization on Indian society; Social empowerment, communalism, regionalism & secularism along with approach and solutions on previous year Questions.

The Future Without a Past Apr 25 2022 "Argues that technological imperatives like rationalization, universalism, monism, and autonomy have transformed the humanities and altered the relation between humans and nature. Examines technology and its impact on education, historical memory, and technological and literary values in criticism and theory, concluding with an analysis of the fiction of Don DeLillo"--Provided by publisher.

**Restaging the Past** Oct 08 2020 Restaging the Past is the first edited collection devoted to the study of historical pageants in Britain, ranging from their Edwardian origins to the present day. Across Britain in the twentieth century, people succumbed to 'pageant fever'. Thousands dressed up in historical costumes and performed scenes from the history of the places where they lived, and hundreds of thousands more watched them. These pageants were one of the most significant aspects of popular engagement with the past between the 1900s and the 1970s: they took place in large cities, small towns and tiny villages, and engaged a whole range of different organised groups, including Women's Institutes, political parties, schools, churches and youth organisations. Pageants were community events, bringing large numbers of people together in a shared celebration and performance of the past; they also involved many prominent novelists, professional historians and other writers, as well as featuring repeatedly in popular and highbrow literature. Although the pageant tradition has largely died out, it deserves to be acknowledged as a key aspect of community history during a period of great social and political change. Indeed, as this book shows, some traces of 'pageant fever' remain in evidence today.

**Sport in Latin American Society** Jan 29 2020 This work deals with

the infancy, adolescence and maturity of sport in Latin American society. It explores ways in which sport illuminates cultural migration and emigration and indigenous assimilation and adaptation.

*Race and Ethnicity in Society* Aug 25 2019 This engaging reader consists of 57 edited articles organized according to seven unifying themes. Part I establishes the importance of examining race as a contemporary social issue. Part II introduces the analytical frameworks that are now being used to think about race in society. Part III examines the most immediately experienced dimensions of race: beliefs and ideology. Part IV examines racial identity and interracial relationships, topics that are especially interesting to students. Part V analyzes the importance of the political economy of race, showing how the economic exploitation of racial groups is buttressed by political arrangements in the state. In particular, the racial division of labor is supported by concepts of citizenship that deny full rights of citizenship to certain groups. Part VI details the consequences of race and racism as manifested in different social institutions, including work, family, health, housing, education, and social justice. Part VII focuses on social movements and social change. Each section includes articles examining the outcomes within social institutions that stem from the reality of racial inequality in society.

**Long Past Slavery** Jun 23 2019 From 1936 to 1939, the New Deal's Federal Writers' Project collected life stories from more than 2,300 former African American slaves. These narratives are now widely used as a source to understand the lived experience of those who made the transition from slavery to freedom. But in this examination of the project and its legacy, Catherine A. Stewart shows it was the product of competing visions of the past, as ex-slaves' memories of bondage, emancipation, and life as freedpeople were used to craft arguments for and against full inclusion of African Americans in society. Stewart demonstrates how project administrators, such as the folklorist John Lomax; white and black interviewers, including Zora Neale Hurston; and the ex-slaves themselves fought to shape understandings of black identity. She reveals that some influential project employees were also members of the United Daughters of the Confederacy, intent on memorializing the Old South. Stewart places ex-slaves at the center of debates over black citizenship to illuminate African Americans'

struggle to redefine their past as well as their future in the face of formidable opposition. By shedding new light on a critically important episode in the history of race, remembrance, and the legacy of slavery in the United States, Stewart compels readers to rethink a prominent archive used to construct that history.

Revisiting the Colonial Past in Morocco Mar 13 2021 Exploring the concept of 'colonial cultures,' this book analyses how these cultures both transformed, and were transformed by, their various societies. Challenging both the colonial vulgate, and the nationalist paradigm, *Revisiting the Colonial Past in Morocco*, examines the lesser known specificities of particular moments, practices and institutions in Morocco, with the aim of uncovering a 'new colonial history.' By examining society on a micro-level, this book raises the profiles of the mass of Moroccans who were highly influential in the colonial period yet have been excluded from the historical record because of a lack of textual source material. Introducing social and cultural history, gender studies and literary criticism to the more traditional economic, political and military studies, the book promotes a more complex and nuanced understanding of Moroccan colonial history. Employing new theoretical and methodological approaches, this volume encourages a re-assessment of existing work and promotes a more interdisciplinary approach to the colonial history of Morocco. *Revisiting the Colonial Past in Morocco* is a highly topical and useful addition to literature on the subject and will be of interest to students and scholars of History, Imperialism and more generally, Middle Eastern Studies.

**War: How Conflict Shaped Us** Mar 25 2022 Is peace an aberration? The bestselling author of *Paris 1919* offers a provocative view of war as an essential component of humanity. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR "Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book."—H.R. McMaster, author of *Dereliction of Duty and Battlegrounds: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity's history, its social and political institutions, its values and ideas. Our

very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. *War: How Conflict Shaped Us* explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.

**Architecture of First Societies** Jan 11 2021 “This book is the most comprehensively global and critically sensitive synthesis of what we now know of the material and socio-cultural evolution of the so-called First Societies. Written by a distinguished architectural historian and theorist, this truly remarkable and indispensable study shows how the material culture of our forebears, from building to clothing, food, ritual and dance, was inextricably bound up with the mode of survival obtained in a particular place and time...It is a study that will surely become required reading for every student of material culture.”—Kenneth Frampton Starting with the dawn of human society, through early civilizations, to the pre-Columbian American tribes, *Architecture of First Societies: A Global Perspective* traces the different cultural formations that developed in various places throughout the world to form the built environment. Looking through the lens of both time and geography, the history of early architecture is brought to life with full-color photographs, maps, and drawings. Drawing on the latest research in archaeological and anthropological knowledge, this landmark book also looks at how indigenous societies build today in order to help inform the past.

*Retrieving Bengal's Past* May 27 2022 This Book Profiles The History Of Bengal In The Nineteenth And Twentieth Centuries.

**Aging in the Past** Jul 29 2022 Thanks to improved food, medicine, and living conditions, the average age of the population is increasing throughout the modern industrialized world. Yet, despite the recent upsurge of scholarly interest in the lives of older people and the blossoming of historical demography, little historical demographic attention has been paid to the lives of the elderly. A landmark volume, *Aging in the Past* marks the emergence of the historical demographic study of aging. Following a masterly explication of the new field by Peter Laslett, leading scholars in family history and historical demography offer new research results and fresh analyses that greatly increase our understanding of aging, historically and across cultures. Focusing primarily on post-Industrial Europe and the United States, they explore a range of issues under the broad topics of living arrangements, widowhood, and retirement and mortality. This important work provides a much-needed historical perspective on and suggests possible alternative solutions to the problems of the aged. Contributors: George Alter, Rudolf Andorka, Allen C. Goodman, Myron P. Gutmann, Michael R. Haines, E. A. Hammel, Tamara K. Hareven, Nancy Karweit, David I. Kertzer, Peter Laslett, Andrejs Plakans, Roger L. Ransom, Daniel Scott Smith, Richard Sutch, Peter Uhlenberg, Richard Wall, Charles Wetherell This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1995.

**Monsters in Society** Jun 03 2020 Dragons, giants, and the monsters of learned discourse are rarely encountered in the Sagas of Icelanders, and therefore, the general teratological focus on physical monstrosity yields only limited results when applied to them. This, however, does not equal an absence of monstrosity – it only means that monstrosity is conceived of differently. This book shifts the view of monstrosity from the physical to the social, accounting for the unique social circumstances presented in the *Íslendingasögur* and demonstrating how closely interwoven the social and the monstrous are in this genre. Employing literary and cultural theory as well as

anthropological and historical approaches, it reads the monsters of the *Íslendingasögur* in their literary and socio-cultural context, demonstrating that they are not distractions from feud and conflict, but that they are in fact an intrinsic part of the genre's re-imagining of the past for the needs of the present.

**Women in English Society, 1500-1800** Mar 01 2020 Provides a systematic analysis of various aspects of women's lives between 1500 and 1800, concentrating on detailed research into specific groups of women where it has been possible to build up a picture in some detail.

*The Cost of Courage in Aztec Society* Aug 06 2020 A collection of pathbreaking essays on Aztec and Maya culture in the sixteenth century.

*The Return of the Past* May 15 2021 This book argues that the Arab Spring brought to the forefront numerous societal, political, and historical problems in the Middle East that scholars and practitioners throughout the 20th century and into the 21st century have continually glossed over or reduced in their analysis and analytical frameworks when studying the Middle East. These include the prevalent and persistent impact of Islam on political life, an impact of transnational and subnational identities, including sect, tribe, and regional identity, as well as the overuse of the state as the fundamental unit of analysis when studying the region. As a result, this book asserts that primordial identities including religion, sect, and tribe have, and will continue to have, a significant impact on the conduct of politics in the Middle East.

Sappho was a Right-on Woman Apr 01 2020 "This is the first account written by women--by Lesbians--about themselves and their struggle. For Lesbians, as for most women today, the present is experience as a collision between the past and future. The first part of *Sappho Was a Right-on Woman*, "What It Was Like," deals with the past: the guilt, the shame, the duplicity, that are part of living in a society that condemns Lesbians--when it cannot ignore them. Temporary sanctuaries (bars, gay ghettos, vacation spots) and "bizarre" behavior are part of the past for some Lesbians, and still very much part of the present for many. The second part of the book, "Living the Future," reflects profound change taking place within society, the women's movement, and most important, within Lesbians themselves--change that make it possible for them to stop making unnecessary apologies and start function as

whole people. Defying the present is still not easy, the authors say, but it is infinitely preferable to the self-degradation society has gone to such pains to teach the Lesbian. Sappho Was a Right-on Woman speaks clearly, honestly, openly, to those women and men, homosexual and heterosexual, oppressing and oppressed, who are still living in the past. It invites them to "come out"--Out of their closets, out of their unexamined prejudice and unresolved confusion--and live into the future with "an appreciation of both the differences and the common humanity" necessary for constructive change"--Publisher's description on book jacket.

**New Women in the Old West** Dec 10 2020 A riveting and previously untold history of the American West, as seen by the pioneering women who advocated for their rights amidst challenges of migration and settlement, and transformed the country in the process Between 1840 and 1910, hundreds of thousands of men and women traveled deep into the underdeveloped American West, lured by adventure, opportunity, and the spirit of Manifest Destiny. These settlers soon realized that survival in a new society required women to compromise eastern sensibilities and take on some of their husbands' responsibilities. At a time when women had very few legal or economic--much less political--rights, these women soon proved just as essential as men to westward expansion. During the mid-nineteenth century, the traditional domestic model of womanhood shifted to include public service, with the women of the West becoming town mothers who established schools, churches, and philanthropies, while also coproviding for their families. They claimed their own homesteads and graduated from new, free coeducational colleges that provided career alternatives to marriage. In 1869, the men of the Wyoming Territory gave women the right to vote--partly to persuade more of them to move west--but with this victory in hand, western suffragists fought relentlessly until the rest of the region followed suit. By 1914 western women became the first American women to vote--a right still denied to women in every eastern state. In *New Women in the Old West*, Winifred Gallagher brings to life the riveting history of the little-known women--the White, Black, and Asian settlers, and the Native Americans and Hispanics they displaced--who played monumental roles in one of America's most transformative

periods. Drawing on an extraordinary collection of research, Gallagher weaves together the striking legacy of the persistent individuals who not only created homes on weather-wracked prairies, but also played a vital, unrecognized role in the women's rights movement and forever redefined the "American woman."

**Race in Society** Feb 09 2021 *Race in Society* is a thorough yet brief text intended primarily for race and ethnicity courses. It is anchored in contemporary social science scholarship and is written in a narrative style that makes it easily accessible to students.

*Women's Work: The First 20,000 Years Women, Cloth, and Society in Early Times* Jul 05 2020 "A fascinating history of...[a craft] that preceded and made possible civilization itself." —New York Times Book Review New discoveries about the textile arts reveal women's unexpectedly influential role in ancient societies. Twenty thousand years ago, women were making and wearing the first clothing created from spun fibers. In fact, right up to the Industrial Revolution the fiber arts were an enormous economic force, belonging primarily to women. Despite the great toil required in making cloth and clothing, most books on ancient history and economics have no information on them. Much of this gap results from the extreme perishability of what women produced, but it seems clear that until now descriptions of prehistoric and early historic cultures have omitted virtually half the picture. Elizabeth Wayland Barber has drawn from data gathered by the most sophisticated new archaeological methods—methods she herself helped to fashion. In a "brilliantly original book" (Katha Pollitt, Washington Post Book World), she argues that women were a powerful economic force in the ancient world, with their own industry: fabric.

Redressing the Past Sep 26 2019 *Redressing the Past* argues that early English-Canadian women's drama expresses the conflict between equality feminism and maternal feminism: on the one hand these works represent women's social and political emancipation; on the other, they affirm patriarchal structures and the status quo. This study calls into question what traditionally constitutes drama by treating plays written in non-canonical forms, mounted in non-professional venues, and published by marginal presses - or not at all - as important literary, theatrical, and historical documents.

## **The Past in Contemporary Society: Then, Now** Dec 22 2021

Changes or innovations which threaten 'our heritage' arouse great hostility in those who want to preserve the past in its entirety. 'The heritage' has become a commodity, a device to sell everything from biscuits to country houses. Fowler skilfully examines the present relationship between the past and the present, analysing the manner in which we mould and interpret the past to fit our current needs. He assesses the influence of our heritage in the last decade of the 20th century, and with a wide range of examples judges the consequences of the increasing pressures of the heritage industry. As well as a diagnosis of where the past is being misused, he provides prescriptions for responsible development, and a thoughtful interpretation of a common past. As well as addressing the needs of the professional involved in the heritage industry he also considers the consumer - all those who visit museums, enjoy a historic site or an art exhibition, or who simply dislike the hijacking of our common heritage by commercial or vested interests.

**The End of Men** Sep 30 2022 Essential reading for our times, as women are pulling together to demand their rights— A landmark portrait of women, men, and power in a transformed world. “Anchored by data and aromatized by anecdotes, [Rosin] concludes that women are gaining the upper hand.” –The Washington Post Men have been the dominant sex since, well, the dawn of mankind. But Hanna Rosin was the first to notice that this long-held truth is, astonishingly, no longer true. Today, by almost every measure, women are no longer gaining on men: They have pulled decisively ahead. And “the end of men”—the title of Rosin’s Atlantic cover story on the subject—has entered the lexicon as dramatically as Betty Friedan’s “feminine mystique,” Simone de Beauvoir’s “second sex,” Susan Faludi’s “backlash,” and Naomi Wolf’s “beauty myth” once did. In this landmark book, Rosin reveals how our current state of affairs is radically shifting the power dynamics between men and women at every level of society, with profound implications for marriage, sex, children, work, and more. With wide-ranging curiosity and insight unhampered by assumptions or ideology, Rosin shows how the radically different ways men and women today earn, learn, spend, couple up—even kill—has turned the big picture upside down. And in *The End of Men* she helps

us see how, regardless of gender, we can adapt to the new reality and channel it for a better future.

*Past, Present and Future of Research in the Information Society* Jan 23 2022 This book examines the role of research and the production of knowledge in the information society, with special emphasis on developing areas of the world. It is based on a three day conference that immediately precedes the second phase of the World Summit on the Information Society (WSIS), in Tunisia (November 2005). Core issues of the conference lie at the intersection of computer science and engineering, information and communication technologies, the world wide web and development. The book contains current and cutting-edge technologies and trends in the utilization of information technology for science and engineering.

**Water and Society from Ancient Times to the Present** May 03 2020 As water availability, management and conservation become global challenges, there is now wide consensus that historical knowledge can provide crucial information to address present crises, offering unique opportunities to appreciate the solutions and mechanisms societies have developed over time to deal with water in all its forms, from rainfall to groundwater. This unique collection explores how ancient water systems relate to present ideas of resilience and sustainability and can inform future strategy. Through an investigation of historic water management systems, along with the responses to, and impact of, various water-driven catastrophes, contributors to this volume present tenable solutions for the long-term use of water resources in different parts of the world. The discussion is not limited to issues of the past, seeking instead to address the resonance and legacy of water histories in the present and future. *Water and Society from Ancient Times to the Present* speaks to an archaeological and non-archaeological scholarly audience and will be a useful primary reference text for researchers and graduate students from a variety of disciplinary backgrounds including archaeology, anthropology, history, ecology, geography, geology, architecture and development studies.

**Paradoxes of Gender** Oct 20 2021 In this pathbreaking book, a well-known feminist and sociologist--who is also the Founding Editor of *Gender & Society*--challenges our most basic assumptions about gender. Judith Lorber views gender as wholly a product of socialization subject to human agency, organization, and interpretation. In her new paradigm, gender is an institution comparable to the economy, the family, and religion in its significance and consequences. Drawing on many schools of feminist scholarship and on research from anthropology, history, sociology, social psychology, sociolinguistics, and cultural studies, Lorber explores different paradoxes of gender: --why we speak of only two "opposite sexes" when there is such a variety of sexual behaviors and relationships; --why transvestites, transsexuals, and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies; --why most of our cultural images of women are the way men see them and not the way women see themselves; --why all women in modern society are expected to have children and be the primary caretaker; --why domestic work is almost always the sole responsibility of wives, even when they earn more than half the family income; --why there are so few women in positions of authority, when women can be found in substantial numbers in many occupations and professions; --why women have not benefited from major social revolutions. Lorber argues that the whole point of the gender system today is to maintain structured gender inequality--to produce a subordinate class (women) that can be exploited as workers, sexual partners, childbearers, and emotional nurturers. Calling into question the inevitability and necessity of gender, she envisions a society structured for equality, where no gender, racial ethnic, or social class group is allowed to monopolize economic, educational, and cultural resources or the positions of power.
