The chapters show the possibilities for enhancing achievement in school mathematics if a strength-based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance – fitness for the context in which teachers are teaching – of the “ goods ” developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics teachers, school leaders, mathematics curriculum advisors, policy makers and researchers.

Caught in the Net Jan 23 2022 "I don't even help [my children] with their homework in the evening because I'm in the chat rooms, and I don't help put them to bed because I don't realize how late it is. I also don't help them get ready for school in the morning like I used to do because I'm checking my e-mail. And I just can't stop myself."-Raymond, an Internet addict. Internet addiction is real. Like alcoholism, drug addiction, or compulsive gambling, it has devastating effects on the lives of addicts and their families: divorce, job loss, falling productivity at work, failure in school, and, in extreme cases, criminal behavior. The problem has already reached epidemic proportions in the United States, and the number of "netaholics" continues to grow rapidly as more households and businesses go on-line. Yet, until now, no one from the mental health community has come forward with a specific description of Internet addiction and its effects or a strategy for treatment and recovery. In Caught in the Net, Kimberly Young shares the results of her three-year study of Internet abuse. Often using the words of the Internet addicts themselves, she presents the stories of dozens of lives that were shattered by an overwhelming compulsion to surf the Net, play MUD games, or chat with distant and invisible neighbors in the timeless limbo of cyberspace. Why is the Internet so seductive? What are the warning signs of Internet addiction? Is recovery possible? Dr. Young answers these questions and many more. She provides a questionnaire to help Net users determine whether they are addicts, and offers concrete steps to help problem users regulate Internet usage and devise a more balanced place for it in their daily lives. For Internet addicts as well as their parents, spouses, friends, and employers, Caught in the Net offers guidance on where and how to seek help from counselors, therapists, and other professionals who take this affliction seriously. For mental health professionals, this book provides insights into the nature and causes of Internet addiction and encourages counselors and therapists to expand their addiction recovery programs to address the specific problems of Internet addicts. "Think that computer addiction is a joke? Think again. This groundbreaking book is the first to explore on-line addiction in a serious way and to consider the effects on individuals and their families. Caught in the Net is an important book for anyone who spends mornings and evenings connected to the Net."-Clifford Stoll, author of The Cuckoo's Egg and Silicon Snake Oil. "An excellent account of the dangers of the burgeoning Internet industry. Dr. Young carefully outlines the traps into which people can fall and offers pragmatic self-help suggestions. Caught in the Net is valuable for both consumers and the professionals who deal with them."-Maressa Hecht

Caught in the Crossfire May 15 2021 Caught in the Crossfire reveals how the United States has been gradually changing from a society that celebrates childhood into one that is hostile to and afraid of its own children. Today kids are often seen as a threat to our social and moral values. In schools, some behavior is criminalized, and growing numbers of kids find themselves in penal and psychiatric confinement. This breakdown is often too readily attributed to bad parenting, the crisis of the family, or the greed of capitalism. Grossberg offers a new and original understanding of the changes transforming contemporary America, and of the choices Americans face about their future. He documents the relations between economic ideologies and economic realities and explores what is going on in the "culture wars" as well as on the Internet and other new media. Caught in the Crossfire argues that all of these changes and struggles, including those involving the state of kids, only make sense as integral parts of a larger transformation to define America's uniqueness and to develop its own sense of modern culture. Part of the Cultural Politics and the Promise of Democracy Series.

Caught in the Current Sep 18 2021 Science tells us what is. Technology tells us what can be. But neither can tell us what ought to be. As a science and technology journalist for the Atlanta Journal-Constitution, Jay Bookman has witnessed some of the most remarkable and exciting advances in human history--supercomputers, cyborgs, genetic engineering. Like the rest of us, though, he has also watched as ever-more sophisticated tools intended to make our lives easier and less stressful have often done the opposite. The problem, he says, lies not in our tools, but in ourselves. In Caught in the Current, Bookman and four friends embark on their annual rafting trip down the Deschutes River in central Oregon. Leaving cell phones, pagers, and laptops behind, they float for 60 miles through stark desert canyons, whitewater rapids and some of the best trout-fishing in America. But this is also a journey of another sort, an exploration of the many ways in which technology has altered how human beings experience each other and the world around them. We live today in the most connected society in history, and yet our sense of isolation has never been more acute. We communicate megabytes of data, but somehow knowledge or wisdom still escape us. The cell phone is our tool, our servant, but it is also a barbaric interloper that we have not yet dared to tame. In his finely tuned prose, Bookman contrasts the rhythm of life on the Deschutes with the increasingly fragmented and chaotic pace of our

electronic age and reveals how the momentum of technology often breaks the flow of life. Our time is segmented into tasks to be completed; our personal interactions often take place behind a flashing cursor; our focus is "faster," not "better." Transfixed by the marvels of technology, we've overlooked its profound impact on our community. Neither a technophobe nor Luddite, Bookman accepts that technological change is inevitable and desirable. But in *Caught in the Current*, he also warns that we should not become passive subjects of that change, allowing ourselves to be tossed like helpless driftwood in the current.

Caught in the Web of Words Oct 20 2021 This unique and celebrated biography describes how a largely self-educated boy from a small village in Scotland entered the world of scholarship and became the first editor of the Oxford English Dictionary and a great lexicographer. It also provides an absorbing account of how the dictionary was written, the personalities of the people working on it, and the endless difficulties that nearly led to the whole enterprise being abandoned. "It is a magnificent story of a magnificent man, one of the finest biographies of the twentieth century, as its subject was one of the finest human beings of the nineteenth." --Anthony Burgess "A moving and dramatic story . . . sometimes tragic, often comic, ultimately triumphant." --Times (London) "A biography that possesses many of the virtues of James Murray himself--grace, humor, intelligence, curiosity, and scholarship." --Time "In her vivid biography, Murray's granddaughter brings his remarkable personality to life, and provides an unexpectedly fascinating account of the OED's long and difficult birth." --Times Literary Supplement "A gripping, engaging story; endearing, too. The daily round of a big Victorian family, with its jokes, games, and treasured seaside holidays, is entrancingly evoked." --Sunday Times (London)

Caught in the Lies Jun 27 2022 Fire captain Cameron McClain dropped into my life with as much subtlety as an unsolicited d*ck pic. I shouldn't be attracted to him, but I am. Caught in the Act Feb 21 2022 Litvak demonstrates that private experience in the novels of Austen, Charlotte Brontë, Eliot, and James is a rigorous enactment of a public script that constructs normative gender and class identities. He suggests that the theatricality which pervades these novels enforces social norms while introducing opportunities for novelists to resist them. This approach encourages a rethinking of the genre and its cultural contexts in all their instability and ambivalence.
