Administration of Intravenous Medication Jul 31 2022 This training uses patient scenarios to illustrate how the healthcare professional can use information from a drug reference and the specific patient situation to select the best method of administration. It demonstrates the three methods of administration: (1.) direct infusion ? when the patient has a medication lock, an infusing IV, or an incompatible intravenous infusion; (2.) intermittent infusion ? when the patient has a medication lock or an infusing IV; and (3.) continuous infusion. The program stresses the importance of critical thinking skills in the correct administration of IV medications.

Intravenous Infusion Therapy for Nurses Jan 13 2021 This comprehensive guide to venipuncture and intravenous therapy is a must have for any health care professional responsible for IV therapy. This book covers all aspects of intravenous infusion therapy and includes a review of the nursing process, fluid and electrolytes, acid-base balance, and infection control, all extremely important topics in today's world of health care. WAIS-IV, WMS-IV, and ACS Nov 22 2021 This book provides users of the Wechsler Adult Intelligence Scale (WAIS-IV) with information on applying the WAIS-IV, including additional indexes and information regarding use in special populations for advanced clinical use and interpretation. The book offers sophisticated users of the WAIS-IV and Wechsler Memory Scale (WMS-IV) guidelines on how to enhance the clinical applicability of these tests. The first section of the book provides an overview of the WAIS-IV, WMS-IV, and new Advanced Clinical Solutions for Use with the WAIS-IV/WMS-IV (ACS). In this section, examiners will learn: Normal versus atypical score variability Low-score prevalence in healthy adults versus clinical populations Assessing whether poor performance reflects a decline in function or is the result of suboptimal effort New social cognition measures found in the ACS are also presented. The second part focuses on applying the topics in the first section to specific clinical conditions, including recommended protocols for specific clientele (e.g. using demographically adjusted norms when evaluating individuals with brain injury). Common clinical conditions are discussed, including Alzheimer's disease, mild cognitive impairment, traumatic brain injury, and more. Each chapter provides case examples applying all three test batteries and using report examples as they are obtained from the scoring assistant. Finally, the use of the WAIS-IV/WMS-IV and the ACS in forensic settings is presented. Coverage of administration and scoring of WAIS-IV, WMS-IV and ACS Information contained on the use of WAIS-IV with special populations Case studies in each chapter Written by the creators of WAIS-IV, WMS-IV and ACS

Crossing the Quality Chasm Jul 27 2019 Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

Intravenous Infusion Therapy for Medical Assistants Oct 29 2019 This essential publication focuses on what the CMA needs to know about intravenous infusion therapy. Infusion or IV therapy has long been part of the acute care of patients. However, more patients are receiving IV therapy at home, in emergency centers, at infusion centers, and in dialysis clinics. Thus, CMAs often need to understand IV therapy to lay out the equipment, to monitor the patient, to assess the infusion site, to discontinue the infusion, and perhaps even to insert the IV. The purpose of this book is to help you understand the theory of IV therapy. With patient safety in mind, risks, complications, and adverse reactions are discussed in *Intravenous Infusion Therapy for Medical Assistants*. Giving the correct medication is crucial to the CMA, so intravenous infusion preparations are compared and contrasted. Sidebars of Medical Assisting Alerts and Tips are distributed throughout the text to highlight key safety concerns and professional issues. Each chapter concludes with Review Questions and Activities to ensure that learning objectives have been met.

WAIS-IV Clinical Use and Interpretation Jun 05 2020 Published in August of 2008, WAIS-IV is the most widely used intelligence test for adults in the world. Substantive changes were made to the WAIS-IV from the WAIS-III leaving clinicians with questions as to how to use and interpret the measure effectively. Written by the creators of the new test, this book serves as the ultimate insider's guide to the new test, providing users with the kind of access to norms and data that would be unavailable to any subsequent book on clinical use of this measure. The book discusses the changes made between 3rd and 4th editions along with an FAQ and answers about use and interpretation. The reader is instructed how to interpret composite scores, and everything needed to use and interpret two entirely new composite scores: the General Ability Index (GAI), and the Cognitive Proficiency Index (CPI). This information does NOT appear in the manual accompanying the test. The second section of the book focuses on WAIS-IV use and interpretation with special clinical applications and populations, including with multicultural clients, in neuropsychological settings, with individuals experiencing psychological disorders, and with older adults.
